

### Number Of Claims By State.

#### Number of Claims by State

### Total number of Amount Approved to States.

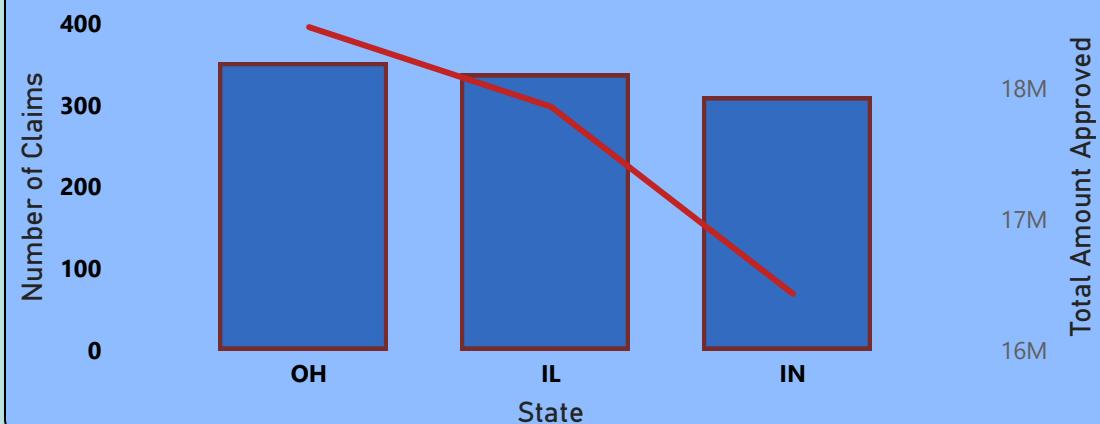

#### Total Amount Approved by States

### Comparison of Claims Count and Approved Amount Across States.

#### Number of Claims and Total Amount Approved by State

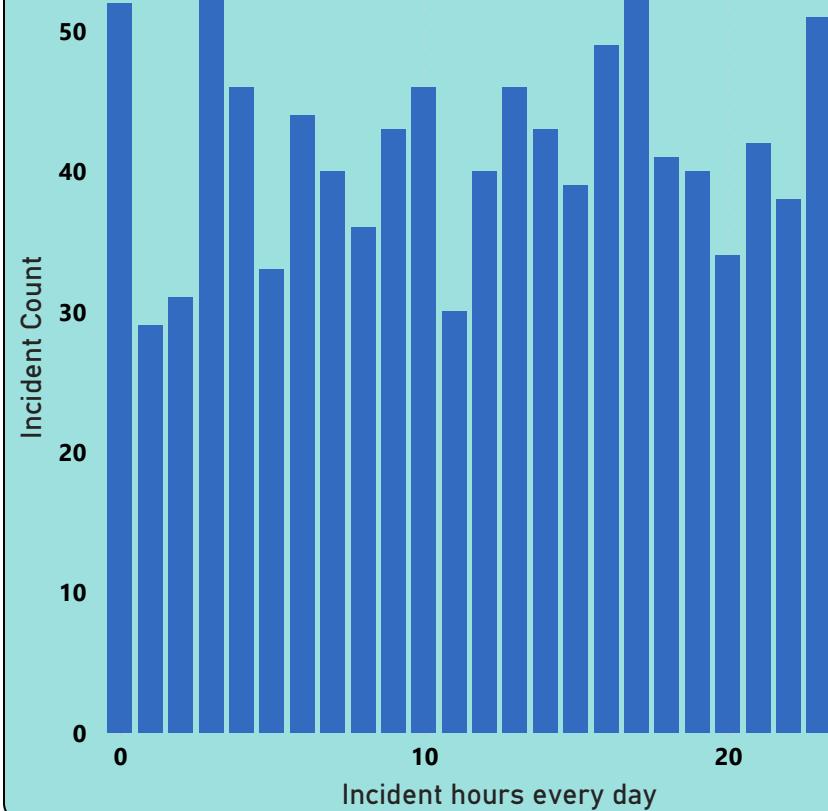

● Number of Claims ● Total Amount Approved

**Explanation:** This dashboard shows a state-wise analysis of insurance claims. It highlights the number of claims processed and the total amount approved across different states. The combined chart helps compare claim volume with financial impact, making it easier to identify states with higher risk and exposure.

## Incident by the Time of Day

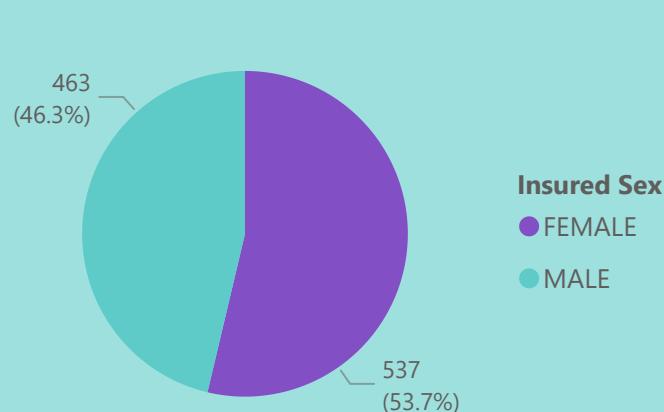

Incident Count by Incident hours every day

**Explanation:** This graph shows the distribution of incidents across different hours of the day. It helps identify peak time periods when incidents are more frequent.

## Incident by Gender

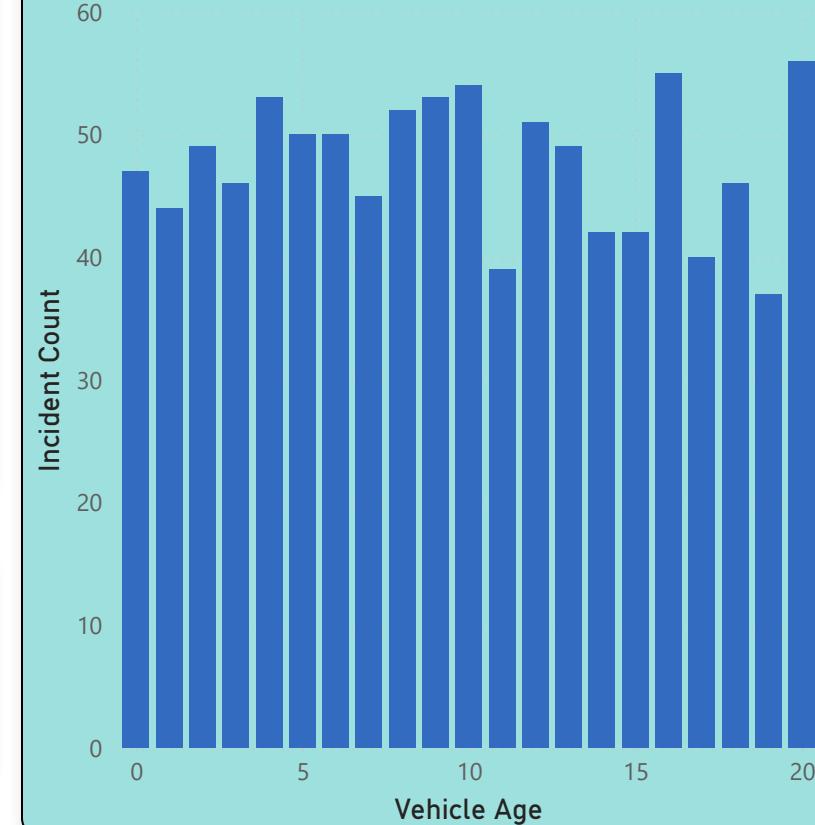

Incident Count by Insured Sex

**Explanation:** This pie chart compares the number of incidents involving different genders. It highlights how incident frequency varies across gender groups.

## Incidents by Vehicle Age

Incident Count by Vehicle Age

**Explanation:** This graph illustrates how incident count changes with vehicle age. The trend indicates that older vehicles tend to be associated with a higher number of incidents.
